

MARK DIGITAL SERVICES LTD

WEBSITE REQUIREMENTS & DISCOVERY DOCUMENT

*Professionally prepared website content, brand direction and technical requirements
for website planning, design, development and launch.*

Company	Mark Digital Services LTD
RC Number	9435450
Date of Registration	23 March 2026
Prepared For	Company Representative / Website Development Team

Status: ACTIVE • Private Company Limited by Shares

How to use this document

This completed version is designed to give the website developer a clear, professional starting point. Company facts such as the legal name, registration number, registration date, registered address and principal business activities are based on the supplied Corporate Affairs Commission documents. Strategic brand language, website structure, design direction and operational recommendations are proposed for a newly established business and can be edited by the company before final approval.

Items marked “Proposed” are recommendations rather than existing claims. The company should confirm availability of the proposed domain, social handles, Google Business Profile, testimonials, portfolio materials, team photographs and any third-party integrations before publication.

1. Company Information

Requirement / Question	Company Response
Official company name	Mark Digital Services LTD
Brief company description (3–5 paragraphs)	Mark Digital Services LTD is a newly established Nigerian digital and technology company focused on helping businesses, organisations, entrepreneurs and individuals use technology to communicate, operate and grow more effectively. The company was incorporated in Nigeria on 23 March 2026 as a private company limited by shares. Its registered business activities cover website design and software development, social media management, business promotion and digital branding, technology training and skill development, and the supply of ICT equipment and technology accessories. The company is positioned as a practical digital partner rather than simply a service vendor. Its approach is to understand a client's goals, build or recommend suitable digital solutions, and provide clear support that can help the client improve visibility, productivity, skills and digital presence. As a growing company, Mark Digital Services LTD intends to build long-term relationships with individuals, SMEs, organisations, institutions and other clients that need dependable digital services, technology support and practical skills development.
Year established	2026. The company was incorporated on 23 March 2026.
Main business activities	Website design and software development; social media management, business promotion and digital branding; technology training and skill development; supply of ICT equipment and tech accessories.
Target customers / target audience	SMEs and growing businesses; entrepreneurs and startups; NGOs and community organisations; schools and training organisations; professionals and creators; institutions requiring digital solutions, technology training, online visibility or ICT equipment.
Countries, cities or regions served	Nigeria as the primary market, with services capable of being delivered remotely to clients in other countries where appropriate. Initial business operations can be positioned as Nigeria-focused with nationwide digital service delivery.
What makes the company different?	A practical combination of digital services, business promotion, technology training and ICT supply under one brand. The proposed brand promise is to make digital tools more useful,

	accessible and growth-oriented for clients, with solutions tailored to real business and learning needs.
Company history / background	Mark Digital Services LTD was incorporated in Nigeria in March 2026. The company was established to provide structured digital and technology services spanning web development, digital branding, social media management, technology skills development and ICT equipment supply. As a new company, the website should present it as an emerging professional brand with a clear growth-focused direction rather than exaggerating a long operating history.
Mission statement	To empower businesses, organisations and individuals with practical digital solutions, technology skills and reliable ICT resources that improve visibility, productivity, learning and sustainable growth.
Vision statement	To become a trusted digital and technology partner in Nigeria and beyond, known for practical innovation, accessible technology solutions, strong service and meaningful client growth.
Core values	Innovation • Integrity • Professionalism • Client Focus • Learning • Reliability • Creativity • Accessibility • Continuous Improvement
Key achievements, certifications or registrations to display	Corporate Affairs Commission incorporation as MARK DIGITAL SERVICES LTD; RC Number 9435450; incorporated 23 March 2026; Private Company Limited by Shares; Tax Identification Number 2622237423339. The website should display the CAC registration information professionally, without publishing unnecessary personal shareholder information.

2. Services

Requirement / Question	Company Response
Complete list of services offered	1) Website Design & Software Development; 2) Social Media Management; 3) Business Promotion & Digital Marketing; 4) Digital Branding & Creative Content; 5) Technology Training & Skill Development; 6) ICT Equipment & Tech Accessories Supply.
Description of each service	Website Design & Software Development — responsive websites, business websites, landing pages, web solutions and software-related development tailored to client needs. Social Media Management — content planning, account management, audience engagement, brand consistency and performance-focused social media support. Business Promotion & Digital Marketing — digital campaigns and promotional support designed to increase online visibility, reach relevant audiences and support business objectives. Digital Branding & Creative Content — brand presentation, social media creatives, promotional graphics and other digital content that helps businesses communicate consistently. Technology Training & Skill Development — practical training and capacity development in relevant digital and technology skills for individuals, teams, organisations and learning communities. ICT Equipment & Tech Accessories Supply — sourcing and supply of appropriate computers, networking items, peripherals and

	technology accessories, subject to availability and agreed specifications.
Key benefits of each service	Website/software: professional online presence, improved accessibility and stronger customer journeys. Social media: consistent visibility, engagement and content management. Promotion/marketing: broader reach and lead-generation opportunities. Branding/content: stronger visual identity and communication. Training: practical digital capability and employability. ICT supply: convenient access to relevant technology products and accessories.
Target customer for each service	Web/software — businesses, organisations, entrepreneurs and institutions. Social media/marketing — brands, SMEs, NGOs, creators and professionals. Branding/content — businesses, campaigns, organisations and personal brands. Training — individuals, schools, organisations and teams. ICT supply — businesses, schools, offices, institutions and individuals.
Should service pricing be displayed? If yes, provide pricing.	No public pricing at launch. Use “Request a Quote” / “Get Started” calls-to-action. Pricing should be based on project scope, specifications and client requirements. Packages can be added later after the company has established standard service tiers.
Images / icons available for services	No specific service asset library was supplied with the registration documents. Use professionally selected icons/stock visuals initially, then replace with original project photographs, screenshots and branded graphics as the portfolio grows.
Preferred call-to-action for services	Primary CTA: “Request a Quote”. Secondary CTAs: “Get Started”, “Talk to Us”, “Explore Services” and “Chat on WhatsApp”.

3. Website Goals & Target Audience

Requirement / Question	Company Response
Primary purpose of the website	To serve as the official digital presence of Mark Digital Services LTD; clearly communicate the company’s services and credibility; generate enquiries and project opportunities; showcase work; support brand visibility; and provide a foundation for future digital products, training and client services.
Main action visitors should take	Request a Quote or contact the company directly. The site should also provide prominent WhatsApp and click-to-call options.
Primary target audience	Business owners, entrepreneurs, SMEs, organisations, institutions, professionals, creators and individuals seeking digital services, technology training or ICT products.
Target industries / client types	SMEs, startups, NGOs, education and training, professional services, retail/e-commerce, community organisations, creators and general businesses requiring digital support.
Target countries / locations	Primary focus: Nigeria. Remote services may be offered internationally where appropriate.
Competitors or similar companies	No specific competitor list was supplied. For positioning purposes, the website should benchmark against reputable Nigerian digital agencies, web-development companies, social media agencies, ICT training providers and technology solution firms without copying their content or visual identity.
2–5 websites whose design or functionality you like, with links	Proposed design references for the developer to study: Canva (https://www.canva.com/) for clear service presentation and visual hierarchy; HubSpot (https://www.hubspot.com/) for structured business messaging and calls-to-action; Shopify

	(https://www.shopify.com/) for clean product/service journeys. These are design/functionality references only, not claims of partnership or affiliation.
--	---

4. Website Pages & Structure

Requirement / Question	Company Response
Home page – required? What sections should it contain?	Yes. Recommended sections: hero headline + CTA; short company introduction; services overview; why choose Mark Digital Services; process/how it works; selected projects/portfolio; training/technology capability; testimonials when available; FAQs; contact CTA; social links; footer with legal and contact information.
About Us page – required?	Yes. Include company story/background, mission, vision, values, service philosophy, legal registration information and leadership profile.
Services page – required?	Yes. A dedicated services page with clear descriptions, benefits, target client types and enquiry CTAs.
Portfolio / Our Work / Case Studies – required?	Yes. Build the structure from launch, even if initially populated with selected sample/available projects. Clearly label any conceptual/sample work.
Team page – required?	Yes, but keep it concise initially. Start with the company representative/leadership profile and expand as the team grows.
Gallery – required?	Optional at launch. A visual project gallery can be incorporated into the portfolio section and expanded later.
Blog / News / Articles – required?	Yes, preferably as a scalable section. It can launch with a small number of useful articles or be activated once content is ready.
Testimonials / Client Reviews – required?	Yes, but only publish genuine testimonials with appropriate permission. If none are available at launch, omit the section or label it as forthcoming rather than using fabricated reviews.
FAQ page / section – required?	Yes. Include common questions about services, pricing, project timelines, training, ICT supply, payments, support and remote delivery.
Careers page – required?	Yes, preferably as a simple careers/opportunities section. The company expects to create opportunities for resourceful experts, interns and future team members as it grows.
Contact Us page – required?	Yes. Include email, phone, WhatsApp, contact form, social links and registered office information. Add map integration when the appropriate public business location is confirmed.
Privacy Policy – required?	Yes. Include a professionally prepared privacy policy covering contact-form data, cookies/analytics and third-party services used by the website.
Terms & Conditions – required?	Yes. Include website use, service enquiries, intellectual property, payments, project scope, third-party tools and limitations.
Any other pages or sections required?	Recommended: Careers/Opportunities; Resources/Blog; Download Company Profile; Cookie/Consent notice where applicable; a dedicated Training section if training becomes a major offering.
Expected total number of pages	Approximately 8–12 pages at launch, depending on whether Services, Training, Blog, Careers, Legal and Portfolio sections are implemented as separate pages or integrated sections.

5. Team Information

Requirement / Question	Company Response
Number of team members to display	1 at initial launch, with the ability to add more profiles as the organisation grows.
For each member: full name, role/position and short biography	Akor Mark Akoji — Director / Company Representative. Professional profile copy: “Akor Mark Akoji is the Director and company representative of Mark Digital Services LTD, a Nigerian digital and technology company focused on web solutions, digital branding, social media management, technology training and ICT supply. He is committed to building practical digital solutions that help businesses, organisations and individuals improve their online presence, skills and use of technology.”
Professional photo for each team member	To be supplied by the company. Use a clean professional headshot with consistent lighting and a neutral or branded background.
LinkedIn / professional profile for each member, if applicable	Company LinkedIn: https://www.linkedin.com/company/mdg-ltd/ . A personal professional profile may be added separately if the company representative chooses to provide one.
Should only management/leadership be displayed, or the full team?	Leadership/management at launch. Add team members as the company expands and obtains suitable photographs and biographies.

6. Portfolio, Gallery & Testimonials

Requirement / Question	Company Response
Should previous projects / client work be showcased?	Yes. Portfolio presentation should be a major trust-building feature. Since the company is newly incorporated, only genuine work, relevant prior experience that can legally be presented, or clearly labelled sample/concept projects should be displayed.
Portfolio / case study details available?	No formal portfolio pack was supplied in the registration documents. The developer should create a reusable case-study template covering client/problem, objective, solution, services delivered, outcome and visuals.
Office / event / project photographs available?	Not supplied in the registration documents. Company to provide originals when available; professional stock/illustrative visuals may be used temporarily.
Videos available?	Not supplied. Add a video-ready section so future company introduction, training and project videos can be embedded.
Client testimonials / reviews available?	Not supplied. Collect genuine client feedback progressively and publish only with permission.
Client logos that can be displayed	None supplied for publication at this stage. Add only logos for clients/partners for whom the company has permission to publish the logo.
Permission to publish client names, logos, images and testimonials	Obtain written or documented permission before publication. No client names, logos, images or testimonials should be invented.

7. Blog / Content Management

Requirement / Question	Company Response
Is a Blog / News section required?	Yes. Recommended as a scalable content hub for digital tips, technology insights, business promotion, training opportunities, company updates and useful resources.

Who will provide blog articles?	Initially, the company representative and/or an assigned content writer. The website should allow multiple approved contributors in the future.
Who will publish and manage blog posts?	Company representative or an authorised website/content administrator.
Expected publishing frequency	Recommended starting frequency: 2–4 useful posts per month, subject to content capacity.
Existing articles / documents available?	No specific article library was supplied with the registration documents. Existing company materials can be added later.
Are categories, search or filters required?	Yes, preferably categories and search from launch if the CMS supports them efficiently. Suggested categories: Digital Services, Business & Marketing, Technology, Training, Company News and Resources.
Is an admin panel / CMS required for content updates?	Yes. A secure CMS/admin panel is recommended so authorised users can update pages, services, blog posts and selected media without depending on the developer for every change.

8. Contact & Social Media

Requirement / Question	Company Response
Official business email address	markdigitalserviceslimited@gmail.com
Sales / enquiries email	markdigitalserviceslimited@gmail.com
Support email (if applicable)	markdigitalserviceslimited@gmail.com at launch; a dedicated support address can be introduced later.
Primary phone number	+2348117897778
WhatsApp number	+2348117897778 — proposed for WhatsApp integration; confirm that this number is WhatsApp-enabled before launch.
Office address	2, Rock Garden Avenue, Along Ganaja Road, Kogi State, Nigeria. This is the registered address shown in the supplied CAC status report.
Business hours	Proposed: Monday–Friday, 9:00 AM–5:00 PM WAT; Saturday, 10:00 AM–2:00 PM WAT. Final operating hours to be confirmed.
Google Maps location / Google Maps link	Not supplied. Add after the company confirms the preferred public business location and creates/claims the appropriate Google Business Profile.
LinkedIn URL	https://www.linkedin.com/company/mdg-ltd/
Facebook URL	https://web.facebook.com/mark.akor.210789/
Instagram URL	Not supplied. Add once an official company account is created.
YouTube URL	Not supplied. Add once an official company channel is created.
TikTok URL	Not supplied. Add once an official company account is created.
X / Twitter URL	Not supplied. Add once an official company account is created.
Other social media links	None supplied at this stage.
Which email should receive website contact-form enquiries?	markdigitalserviceslimited@gmail.com

9. Branding & Design

Requirement / Question	Company Response
Company logo (PNG / SVG / high-resolution version)	To be supplied by the company. Developer should request SVG/vector and high-resolution PNG versions where available.
Favicon, if available	Not supplied. Create a favicon from the approved company

	logo/brand mark.
Existing brand guidelines	No formal brand guideline document was supplied. Develop a simple starter brand guide as part of the website setup, subject to company approval.
Primary brand colour(s)	Proposed: Deep Navy / Royal Blue as the primary technology-and-trust colour family. Final HEX values should be approved after reviewing the official logo.
Secondary / accent colour(s)	Proposed: White/light neutrals for clarity, with a restrained electric blue or teal accent for buttons and highlights. Final palette should be derived from the approved logo.
Preferred fonts, if any	Proposed: Inter or Manrope for a clean, modern digital feel. Use one primary family consistently across the website.
Preferred website style	Modern, professional, clean, technology-focused, trustworthy and conversion-oriented. Avoid an overly corporate or generic template appearance.
Light theme, dark theme or both?	Light theme as the primary experience, with selected dark sections for visual contrast. A full dark-mode toggle can be considered later.
Design elements / colours to avoid	Avoid excessive gradients, cluttered layouts, overly bright colour combinations, stock-photo overload, tiny text and excessive animation. Avoid colours that conflict with the final approved logo.
Reference websites and what you like about them	Use the proposed Canva, HubSpot and Shopify references for clarity, service presentation, hierarchy and conversion-focused navigation. The final design must remain original to Mark Digital Services LTD.
Any preferred images, illustrations or visual style	Use authentic technology, business, training and digital-work imagery. Prioritise original company/project images as they become available; use high-quality stock visuals only where necessary. Visuals should feel Nigerian/African-aware where relevant without relying on stereotypes.

10. Website Features & Functionality

Requirement / Question	Company Response
Contact form	Yes. Required. Fields should include name, email, phone/WhatsApp, service of interest, message and optional budget/project timeline.
WhatsApp button	Yes. Floating and/or strategically placed CTA linked to +2348117897778, subject to confirmation that the number is WhatsApp-enabled.
Click-to-call button	Yes. Link to +2348117897778.
Google Maps integration	Yes, once the public business location is confirmed.
Newsletter subscription	Recommended but optional at launch. Implement if a compliant email marketing platform is selected.
Live chat / chatbot	Optional. Start with WhatsApp/contact form to keep the launch simple; add live chat/chatbot after traffic and support needs justify it.
Appointment / booking system	Not required at launch. Consider later for consultations and training sessions.
Search functionality	Yes, particularly if the Blog/Resources section grows.
Portfolio / case studies	Yes.
Gallery	Optional; integrate with Portfolio initially.

Blog / CMS	Yes.
Testimonials	Yes, using genuine approved testimonials only.
FAQ	Yes.
Multi-language support	Not required at launch. English should be the primary language; additional languages can be added later if there is a clear market need.
Downloadable company profile / brochures	Yes. Add a downloadable company profile/PDF once the corporate profile is prepared.
Other required functionality	Responsive mobile-first design; SEO-ready page structure; social sharing; secure forms; spam protection; SSL/HTTPS; cookie/consent tools where applicable; analytics; Search Console; basic accessibility; image optimisation; backup and security controls.

11. Domain, Hosting & Technical Setup

Requirement / Question	Company Response
Do you already own a domain? If yes, provide the domain.	No existing domain was supplied. Treat as not yet confirmed.
Preferred / proposed domain name	Primary proposal: markdigitalservices.com, subject to availability and registration. Alternative: markdigitalservices.com.ng or a suitable .ng domain, subject to availability.
Who will purchase and own the domain?	Mark Digital Services LTD should purchase and own the domain directly. Developer may assist with setup but should not retain ownership.
Hosting / VPS already available?	No hosting details were supplied. Treat as not yet available/confirmed.
Preferred hosting provider	Developer may recommend a reputable managed hosting provider based on performance, security, backups, support and budget. Hostinger or an equivalent provider may be considered; final selection requires approval.
Required server region / location, if known	Not specified. Select a reliable region with good performance for Nigerian and international visitors; CDN support is recommended.
Business email / email hosting provider	Current official business email: markdigitalserviceslimited@gmail.com. A professional domain-based mailbox (e.g., info@markdigitalservices.com) may be introduced after domain registration.
Company-owned Google account for website services	Recommended: create/use a company-controlled Google account owned by Mark Digital Services LTD for Analytics, Search Console, Business Profile and other Google services.
Google Analytics required?	Yes.
Google Search Console required?	Yes.
Google Business Profile / Maps setup required?	Recommended, subject to eligibility and confirmation of the public business location.
SSL / HTTPS	Mandatory. Website must launch with valid SSL/HTTPS.
Automated backup requirement	Yes. At minimum, automated daily backups with retention appropriate to the hosting plan; periodic restoration tests are recommended.
DNS management access	Company should retain ownership/control of the domain registrar and DNS. Developer can receive delegated access where required.
Any existing website, server or repository that must be retained?	None supplied.

12. SEO, Analytics & Marketing

Requirement / Question	Company Response
Main services / keywords the company wants to target	Website design Nigeria; web design services; software development Nigeria; social media management Nigeria; digital marketing Nigeria; digital branding; business promotion; technology training; digital skills training; ICT equipment supply; tech accessories; digital solutions for SMEs.
Target cities / countries for search visibility	Nigeria nationwide, with emphasis on major commercial/technology markets such as Lagos, Abuja and other Nigerian cities where service delivery is practical. Avoid claiming a physical office in locations where none exists.
Existing Google Business Profile	Not supplied / not confirmed.
Existing Google Search Console	Not supplied / not confirmed.
Existing Google Analytics	Not supplied / not confirmed.
Social media marketing integration	Yes. Prominent social links and share options; future integration can include campaign landing pages and conversion tracking.
Contact / WhatsApp / phone conversion tracking	Yes. Configure event tracking for contact-form submissions, WhatsApp clicks, phone clicks and key CTA clicks where technically appropriate.
SEO content requirements	Create original, useful and human-readable content around the company's services, target customers and locations. Use proper titles, meta descriptions, headings, internal linking, image alt text, schema where appropriate, fast page performance and regularly updated educational content.

13. Security, Access & Ownership

Requirement / Question	Company Response
Who will own the domain?	Mark Digital Services LTD.
Who will own the hosting / VPS?	Mark Digital Services LTD, with the developer granted appropriate technical access.
Who will own the Google account and website analytics accounts?	Mark Digital Services LTD through a company-controlled Google account.
Who should have administrator access?	The authorised company representative and designated internal administrators. Developer access should be role-based and limited to what is necessary.
Who should have server / deployment access?	Authorised developer/technical personnel and the company's designated technical administrator. Credentials should not be shared publicly.
Backup frequency required	Automated daily backups recommended, with additional backups before major updates.
Security / maintenance requirements	SSL/HTTPS; strong passwords; MFA for key accounts; least-privilege access; secure forms and spam protection; CMS/plugin updates; malware/security monitoring where available; regular backups; uptime monitoring; privacy-conscious analytics; prompt patching of vulnerabilities.
Website source code / repository ownership	Source code, design assets and project files produced specifically for the company should be handed over to and remain under the ownership/control of Mark Digital Services LTD, subject to the developer's contract and any third-party licence

	terms.
Who will manage the website after launch?	Initially, the developer may provide maintenance while the company designates an internal administrator for content updates. A separate maintenance/support arrangement should be agreed.

14. Content & Asset Responsibilities

Requirement / Question	Company Response
Who will provide website text/content?	The company representative will review and approve the core company information. The website developer/content team may professionally draft and structure copy based on this approved discovery document.
Who will provide company/team/project images?	Company to provide authentic logo, team photographs, project screenshots and approved business images. Developer may use suitable licensed stock assets where originals are unavailable.
Who will provide testimonials?	Company/client relationship owner. Only genuine testimonials with appropriate permission should be supplied.
Who will provide blog articles?	Company representative and/or assigned content writer. Developer can provide CMS setup and formatting.
If content/images are unavailable, may stock assets or professionally prepared copy be used?	Yes, provided the assets are properly licensed and the copy is reviewed and approved by the company before publication. No fabricated client claims, testimonials or project results.
Expected date for receiving all content and assets	As soon as practical after the first design/prototype review. Recommended target: within 7–14 days of the developer's formal content request, with missing items supplied progressively.

15. Timeline, Budget & Approval

Requirement / Question	Company Response
Target website launch date	Proposed: within 4–6 weeks after the developer receives the required logo/assets, confirms domain/hosting, and approves the initial design direction. Final date to be agreed with the developer.
Preferred date for first design/prototype	Within 7–10 working days after project kickoff and receipt of the required initial assets/content.
Who will review and approve the design?	Akor Mark Akoji / authorised company representative.
Who will provide final approval before launch?	Authorised representative of Mark Digital Services LTD.
Budget for domain	To be determined after domain availability is checked and the registrar's current price is confirmed.
Budget for hosting / VPS	To be determined after selecting the hosting specification required for the website. Prefer a reliable managed plan appropriate for a growing business rather than overprovisioning at launch.
Budget for premium themes/plugins/tools, if required	To be approved case-by-case. Prioritise essential, licensed tools and avoid unnecessary recurring subscriptions.
Budget for other third-party services	To be agreed based on actual requirements, including email marketing, payment, booking, chatbot or premium media tools if introduced.
Post-launch maintenance arrangement	Recommended: a monthly or quarterly maintenance/support arrangement covering updates, backups, security checks, minor

	content changes and technical support. Exact scope and fee to be agreed with the developer.
Any other project constraints or requirements	The website should be scalable, mobile-first, fast, secure, easy to update and professional enough to support the company's long-term growth. Avoid making unsupported claims about years of experience, client numbers, results or partnerships.

16. Final Approval & Additional Notes

Requirement / Question	Company Response
Additional requirements not covered above	The website should be structured for future expansion into online training, downloadable resources, digital products, client onboarding, payment/checkout functionality and additional service packages without requiring a complete rebuild.
Special instructions / expectations	The final website should feel credible for a newly established professional company while communicating ambition and capability. It should be clear, human, modern and conversion-focused. Use concise messaging, strong calls-to-action, authentic visuals and transparent claims. Ensure the company's legal identity and contact information are consistent throughout the site.
Final comments from Mark Digital Services LTD	We want the website to serve as more than an online brochure. It should be the company's central digital platform for presenting our services, building trust, attracting enquiries, supporting future partnerships and creating opportunities for clients, learners and other stakeholders. The design should be professional and scalable while leaving room for the brand to grow.

Recommended Brand Positioning Summary

The recommended positioning for launch is: “Mark Digital Services LTD — practical digital solutions for modern businesses and people.” This is a proposed brand direction, not a legal slogan.

- Brand personality: Professional, practical, innovative, approachable, reliable and growth-focused.
- Primary promise: Make technology and digital services practical and useful for real-world growth.
- Communication style: Clear, confident, human and solution-oriented; avoid unnecessary technical jargon.
- Primary conversion path: Discover a service → understand the value → request a quote → contact the company.
- Visual direction: Modern technology aesthetic, strong typography, generous white space, authentic business/technology imagery and restrained accent colours.
- Trust elements: CAC registration details, transparent contact information, genuine portfolio, approved testimonials, clear service process and professional team presentation.

Suggested Homepage Messaging

- Hero headline: “Digital Solutions That Help You Build, Connect & Grow.”
- Supporting line: “Mark Digital Services LTD provides website development, digital branding, social media management, technology training and ICT solutions for businesses, organisations and individuals.”
- Primary CTA: “Request a Quote”
- Secondary CTA: “Explore Our Services”
- Trust line: “Technology • Digital Growth • Skills • ICT Solutions”

Legal / Corporate Reference

The supplied CAC documents identify Mark Digital Services LTD as a private company limited by shares, registered in Nigeria under RC Number 9435450 on 23 March 2026. The supplied Memorandum identifies the company's objects as website design and software development; social media management, business promotion and digital branding; technology training and skill development; and supply of ICT equipment and tech accessories.

Approval Checklist Before Development

- Approve company description, mission, vision, values and homepage messaging.
- Provide final logo in SVG/PNG and any existing brand assets.
- Confirm proposed domain name after availability check.
- Confirm hosting provider and ownership arrangement.
- Confirm whether +2348117897778 will be the official WhatsApp number.
- Confirm public business/office location for Google Maps/Business Profile.
- Provide professional director/team photograph.
- Provide any genuine portfolio projects, screenshots, videos, client logos and testimonials that may be published.
- Confirm official Instagram, YouTube, TikTok and X accounts when available.
- Approve final website colours and fonts after logo review.
- Approve legal pages (Privacy Policy and Terms & Conditions) before launch.

- Agree development, maintenance and third-party service budgets with the developer.

Company Confirmation & Approval

By approving this document, Mark Digital Services LTD confirms that the information is intended to guide the planning, design, development and launch of the company website. Proposed recommendations may be revised by the company before final publication.

MARK DIGITAL SERVICES LTD

FEATURED CLIENT CASE STUDY

YouTube Monetization & Channel Growth — Mr. Ben

This case study is prepared from the client/project information supplied for the website content update. It is intended for publication as a portfolio example and should be supported by available channel analytics/screenshots and client approval before publication.

Client / Project	Mr. Ben — YouTube Monetization & Channel Growth
Service Category	YouTube Management, Monetization Strategy, Channel Growth & Digital Content Support
Primary Platform	YouTube
Project Objective	To strengthen the YouTube channel's digital presence, improve audience growth and engagement, optimize the channel for monetization, and support sustainable content growth.
Project Outcome	The YouTube channel has grown to over 200,000 subscribers.
Key Areas of Support	Channel optimization; content and audience-growth strategy; monetization-focused guidance; video/channel optimization; performance monitoring; digital promotion and growth support.
Growth Milestone	200,000+ YouTube subscribers
Business Value	The project demonstrates Mark Digital Services LTD's ability to support creators and brands with practical digital strategies designed around audience development, visibility and monetization.
Recommended Evidence	YouTube channel analytics, subscriber-growth screenshots, monetization confirmation where publishable, selected content-performance screenshots, and client approval.

Website Portfolio Copy

We supported Mr. Ben with YouTube growth and monetization-focused digital services, helping strengthen the channel's positioning, content visibility and audience-development process. Through strategic channel support, optimization and ongoing performance-focused work, the channel has grown to more than 200,000 subscribers.

Suggested Portfolio Highlight

200K+ Subscribers | YouTube Growth & Monetization Support

Suggested Client Testimonial

"Mark Digital Services LTD provided practical support that helped us improve our YouTube presence, audience growth and approach to monetization. Seeing the channel grow beyond 200,000 subscribers has been a major

milestone.” — Mr. Ben

Publication note: The testimonial above should be presented as a client testimonial only after Mr. Ben has reviewed and approved the wording. If it is not an exact statement from the client, label it as an edited/paraphrased testimonial or replace it with the client's actual words.

Suggested Homepage / Services Proof Point

From YouTube monetization support to digital growth strategy, we help creators and businesses build stronger online platforms. One featured project, supporting Mr. Ben's YouTube channel, reached a milestone of over 200,000 subscribers.

Content Accuracy & Evidence

The 200,000+ subscriber figure is included because it was supplied as the project's reported outcome. Before the website goes live, the company should retain supporting analytics or channel evidence and obtain permission to identify Mr. Ben publicly.
